Canon Inc.

imageRUNNER ADVANCE DX 617i(For EU)

Functional unit

Per unit product

System boundary

■ final products □intermediate products Raw Material acquisition, Production, Distributior Use & maintenance, and End-of-Life stage

Main specifications of the product

Model name: imageRUNNER ADVANCE DX 617i(For EU)

Specifications

- •Multi Functional Printer
- (Electrophotography)
- •Print Speed : Up to 61 ipm (A4)
- •Duplex printing
- Weight: approx.33kg(CRG not included)

Company Information

Canon Inc.

30-2, Shimomaruko 3-chome, Ohta-ku, Tokyo 146-8501, Japan +81-3-3758-2111

Registration#	JR-AI-22231C		
PCR number	PA-590000-AI-04		
PCR name	Imaging input and/or output equipment		
Publication date	1/13/2023		
Verification date	12/27/2022		
Verification method	System certificaion		
Verification#	JV-AI-22231C		
Expiration date	12/26/2027		
PCR review was conducted by:			
Approval date	4/1/2022		
PCR review panel chair	Masayuki Kanzaki		
	Sustainable Management Promotion Organization		
Third party verifier*			
	Hiroyuki Uchida		

Independent verification of data & declaration in accordance with ISO/TS14067

□internal ■external

*Auditor's name is stated if system certification has been performed.

Carbon Footprint of Products CFP Declaration

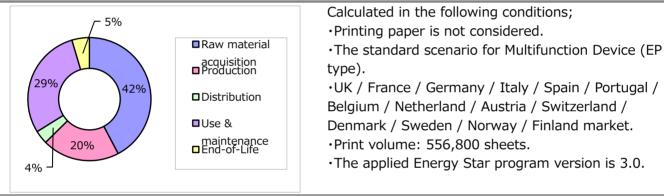

Registration number : JR-AI-22231C

1. Quantification results, and contents of the declaration				
CFP quantification unit : Per unit product				
Parameter			Unit	
CFP Quantification results		1100	kg-CO ₂ eq	
Breakdown	Raw material acquisition	450	kg-CO ₂ eq	
	Production	220	kg-CO ₂ eq	
	Distribution	38	kg-CO ₂ eq	
	Use & maintenance	310	kg-CO ₂ eq	
	End-of-Life	49	kg-CO ₂ eq	
Value on CFP mark		1100	kg-CO ₂ eq	
Unit for the value on CFP mark		Per unit product		

*Quantification results may slightly differ from the sum of the breakdown

due to rounding of fractions.

2. Additional information

4. Interpretation

12/26/2027

•CO2 emission in Raw material acquisition is the largest as 42%. It is important to reduce the size and weight, and to use low environmental impact materials.

•CO2 emission in Use & maintenance is the second largest as 29%. It is important to save energy during product usage, to make the life time of consumables(e.g. drum) longer and to reduce amount of toner used when printing. The condition in this CFP evaluation can be different from the one which the user operates under. A choice of the use condition (print mode, print conditions and so on) can reduce the CO2 emission during Use & maintenance stage.

•We evaluated the CFP with Canon's own data of raw materials weight and the general basic unit for the parts because it is difficult to collect the data for a couple of thousands of parts. Accordingly, the results may be different from the specific product specification.

As such, please be advised that this result would be a rough estimate.

5. Assumptions of secondary data used

IDEA v2.1.3, and registered data of Japan EPD Program by SuMPO, JLCA data v1.10 are used.

6. Remarks

-

- For data quantification, please refer to PCR and Rules on quantification and declaration.

- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)

- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.

Registration number : JR-AI-22231C

3. Supplementary environmental information

Complies with the EU RoHS Directive (2011/65/EU) and its amendments including 2015/863/EU.
Manufactured at ISO 14001 certified factories.
