Sustainable Management Promotion Organization 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

Canon Inc.

imageRUNNER ADVANCE DX 4845i Platen(For EU)

*The Cassette Feeding Unit is excluded.Platen Cover is included instead of Single Pass DADF.

Functional unit	Registration#	JR-AI-23001C
Per unit product	PCR number	PA-590000-AI-05
	PCR name	Imaging input and/or output equipment
System boundary	Publication date	2/10/2023
■ final products □intermediate products	Verification date	2/2/2023
Raw Material acquisition, Production, Distribution,	Verification method	System certificaion
Use & maintenance, and End-of-Life stage	Verification#	JV-AI-23001C
	Expiration date	2/1/2028
Main specifications of the product	PCR review was conducted by:	
Model name: imageRUNNER ADVANCE DX 4845i Platen(For EU) Approval date	4/1/2022
 Specifications Multi Functional Printer (Electrophotography) Print Speed : Up to 45 ipm (A4) Duplex printing Weight: approx.59.7kg 	PCR review panel chair	Masayuki Kanzaki
		Sustainable Management Promotion Organization
	Third party verifier*	
		Hiroyuki Uchida
Company Information	Independent verification of data & declaration in accordance with ISO/TS14067	
Canon Inc.		
30-2, Shimomaruko 3-chome, Ohta-ku,	□internal ■external	
Tokyo 146-8501, Japan +81-3-3758-2111	*Auditor's name is stated if system certification has been performed.	
	Registration number : JR-AI-23001C	

Carbon Footprint of Products **CFP** Declaration

Registration number : JR-AI-23001C

1. Quantification results, and contents of the declaration CFP quantification unit : Parameter Unit **CFP** Quantification results 940 kg-CO₂eq Raw material acquisition 630 kg-CO₂eq Breakdown Production 24 kg-CO₂eq Distribution 58 kg-CO₂eq

150

83

940

Per unit product *Quantification results may slightly differ from the sum of the breakdown due to rounding of fractions.

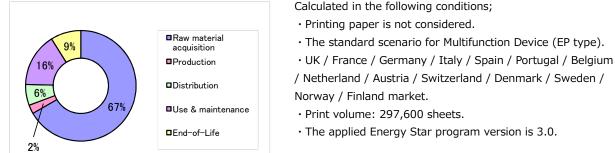

Additional information

Use & maintenance

Value on CFP mark

Unit for the value on CFP mark

End-of-Life

kg-CO₂eq

kg-CO₂eq

kg-CO₂eq

4. Interpretation

· CO2 emission in Raw material acquisition is the largest as 67%. It is important to reduce the size and weight, and to use low environmental impact materials.

· CO2 emission in Use & maintenance is the second largest as 16%. It is important to save energy during product usage, to make the life time of consumables(e.g. drum) longer and to reduce amount of toner used when printing. The condition in this CFP evaluation can be different from the one which the user operates under. A choice of the use condition (print mode, print conditions and so on) can reduce the CO2 emission during Use & maintenance stage.

• We evaluated the CFP with Canon's own data of raw materials weight and the general basic unit for the parts because it is difficult to collect the data for a couple of thousands of parts. Accordingly, the results may be different from the specific product specification.

As such, please be advised that this result would be a rough estimate.

5. Assumptions of secondary data used

IDEA v2.1.3, and registered data of SuMPO Environmental Labeling Program, JLCA data v1.13 are used.

6. Remarks

- For data quantification, please refer to PCR and Rules on quantification and declaration.
- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)
- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.

Sustainable Management Promotion Organization 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

3. Supplementary environmental information

· Complies with the EU RoHS Directive (2011/65/EU) and its amendments including 2015/863/EU.

 Manufactured at ISO 14001 certified factories.
