## Canon Inc.

imageRUNNER ADVANCE DX 4845i 1PDS(For EU)

%The Cassette Feeding Unit is excluded.

Functional unit	Registration#	JR-AI-23003C	
Per unit product	PCR number	PA-590000-AI-04	
	PCR name	Imaging input and/or output equipme	
System boundary	Publication date	2/10/2023	
■ final products □intermediate products	Verification date	2/2/2023	
Raw Material acquisition, Production, Distribution	, Verification method	System certificaion	
Use & maintenance, and End-of-Life stage	Verification#	JV-AI-23003C	
	Expiration date	2/1/2028	
Main specifications of the product	PCR review was conducted by:		
Model name: imageRUNNER ADVANCE DX 4845i 1PDS(For EU) Approval date 4/1/2022			
Specifications	PCR review panel chair	Masayuki Kanzaki	
<ul> <li>Multi Functional Printer (Electrophotography)</li> <li>Print Speed : Up to 45 ipm (A4)</li> </ul>		Sustainable Management Promotion Organizatio	
Duplex printing	Third party verifier*		
Weight: approx.72.56kg		Hiroyuki Uchida	
Company Information	Independent verification of data & declaration in accordance		
Canon Inc.	with ISO/TS14067		
30-2, Shimomaruko 3-chome, Ohta-ku,	□internal ■ external		
Tokyo 146-8501, Japan	*Auditor's name is stated if system certification has been performed.		
±01_2_27E0_0111	Registration number : JR-AI-23003C		

# Carbon Footprint of Products CFP Declaration

Sustainable Manag

Sustainable Management Promotion Organization 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

SuMPO Environmental Labeling Program

3. Supplementary environmental information

• Complies with the EU RoHS Directive (2011/65/EU) and its amendments

Manufactured at ISO 14001 certified

including 2015/863/EU.

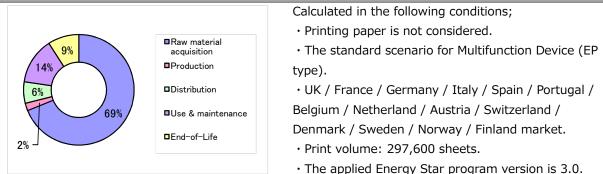

factories.

Registration number : JR-AI-23003C

1. Quantification results, and contents of the declaration				
CFP quantification unit :				
Parameter			Unit	
CF	P Quantification results	1100	kg-CO <sub>2</sub> eq	
Breakdown	Raw material acquisition	760	kg-CO <sub>2</sub> eq	
	Production	24	kg-CO <sub>2</sub> eq	
	Distribution	70	kg-CO <sub>2</sub> eq	
	Use & maintenance	150	kg-CO <sub>2</sub> eq	
	End-of-Life	100	kg-CO <sub>2</sub> eq	
Value on CFP mark		1100	kg-CO <sub>2</sub> eq	
Unit for the value on CFP mark		Per unit product		

\*Quantification results may slightly differ from the sum of the breakdown due to rounding of fractions.

# 2. Additional information

#### 4. Interpretation

• CO2 emission in Raw material acquisition is the largest as 69%. It is important to reduce the size and weight, and to use low environmental impact materials.

• CO2 emission in Use & maintenance is the second largest as 14%. It is important to save energy during product usage, to make the life time of consumables(e.g. drum) longer and to reduce amount of toner used when printing. The condition in this CFP evaluation can be different from the one which the user operates under. A choice of the use condition (print mode, print conditions and so on) can reduce the CO2 emission during Use & maintenance stage.

• We evaluated the CFP with Canon's own data of raw materials weight and the general basic unit for the parts because it is difficult to collect the data for a couple of thousands of parts. Accordingly, the results may be different from the specific product specification.

As such, please be advised that this result would be a rough estimate.

#### 5. Assumptions of secondary data used

IDEA v2.1.3, and registered data of SuMPO Environmental Labeling Program, JLCA data v1.13 are used.

## 6. Remarks

- For data quantification, please refer to PCR and Rules on quantification and declaration.
- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)
- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.
