## Japan EPD Program by SuMPO

Sustainable Management Promotion Organization 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

# 1. Quantification results, and contents of the declaration CFP quantification unit :

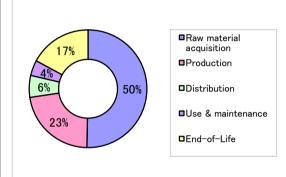

Parameter			Unit
CFP Quantification results		86	kg-CO₂eq
Breakdown	Raw material acquisition	43	kg-CO₂eq
	Production	19	kg-CO₂eq
	Distribution	5.2	kg-CO₂eq
	Use & maintenance	3.6	kg-CO₂eq
	End-of-Life	15	kg-CO₂eq
Value on CFP mark		86	kg-CO₂eq
Unit for the value on CFP mark		Per unit product	

<sup>\*</sup>Quantification results may slightly differ from the sum of the breakdown due to rounding of fractions.

### 3. Supplementary environmental information

- Complies with the EU RoHS Directive (2011/65/EU) and its amendments including 2015/863/EU.
- Manufactured at ISO 14001 certified factories.

## 2. Additional information

Calculated in the following conditions;

- · Printing paper is not considered.
- The standard scenario for Multifunction Device (IJ type).
- · US market.
- · Print volume: 7,200 sheets.
- The applied Energy Star program version is 3.0.

#### 4. Interpretation

- CO<sub>2</sub> emission in Raw material acquisition is the largest as 50%. It is important to reduce the size and weight, and to use low environmental impact materials.
- CO<sub>2</sub> emission in End-of-Life is the second largest as 23%. It is important to reduce the size and weight, and improving recycling rates.
- We evaluated the CFP with Canon's own data of raw materials weight and the general basic unit for the parts because it is difficult to collect the data for a couple of thousands of parts. Accordingly, the results may be different from the specific product specification.

As such, please be advised that this result would be a rough estimate.

# 5. Assumptions of secondary data used

IDEA v2.1.3, and registered data v1.13 of Japan EPD Program by SuMPO are used.

### 6. Remarks

- For data quantification, please refer to PCR and Rules on quantification and declaration.
- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)
- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.
