

Japan EPD Program by SuMPO

Sustainable Management Promotion Organization 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

Canon Inc.

imageCLASS LBP247dw(For US)

Functional unit	Registration#	JR-AI-23379C	
Per unit product	PCR number	PA-590000-AI-08	
	PCR name	Imaging input and/or output equipment	
System boundary	Publication date	11/28/2023	
■ final products □intermediate products	Verification date	11/20/2023	
Raw Material acquisition, Production, Distribution	1, Verification method	System certificaion	
Use & maintenance, and End-of-Life stage	Verification#	JV-AI-23379	
Main specifications of the product	Expiration date	11/19/2028	
Model name	PCR review was conducted by:		
imageCLASS LBP247dw(For US)	Approval date	9/1/2023	
Specifications	PCR review panel chair	Masayuki Kanzaki	
Printer (Electrophotography)BW		Sustainable Management Promotion Organization	
	Third party verifier*		
 Max paper size : LGL Print/Duplex printing 		Hiroyuki Uchida	
Weight: approx.9.06kg(All in one CRG not included)	Independent verification of data & declaration in accordance with ISO/TS14067		
Company Information	□internal ■external		
Capon Inc	* Auditaria name is stated if sustance contification has been performed		

Canon Inc. 30-2, Shimomaruko 3-chome, Ohta-ku, Tokyo 146-8501, Japan +81-3-3758-2111 *Auditor's name is stated if system certification has been performed.

Registration number : JR-AI-23379C

Carbon Footprint of Products CFP Declaration

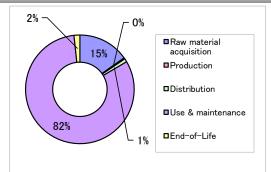

Registration number : JR-AI-23379C

1. Quantification results, and contents of the declaration CFP quantification unit :

Parameter			Unit
CF	P Quantification results	790	kg-CO ₂ eq
_	Raw material acquisition	120	kg-CO ₂ eq
	Production	2.8	kg-CO ₂ eq
Breakdown	Distribution	8.1	kg-CO ₂ eq
3rea	Use & maintenance	650	kg-CO ₂ eq
	End-of-Life	14	kg-CO ₂ eq
Value on CFP mark		790	kg-CO ₂ eq
Unit for the value on CFP mark		Per unit product	

*Quantification results may slightly differ from the sum of the breakdown due to rounding of fractions.

2. Additional information

Japan EPD Program by SuMPO

Sustainable Management Promotion Organization 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

3. Supplementary environmental information

• Complies with the EU RoHS Directive (2011/65/EU) and its amendments including 2015/863/EU.

• Manufactured at ISO 14001 certified factories.

Calculated in the following conditions;

- Printing paper is not considered.
- The standard scenario for Printer (EP type).
- US market.
- Print volume: 259,200 sheets.
- The applied Energy Star program version is 3.0.

4. Interpretation

CO₂ emission in Use & maintenance is the largest as 82%. It is important to save energy during product usage, to make the life time of consumables(e.g. all in one CRG) longer and to reduce amount of toner used when printing. The condition in this CFP evaluation can be different from the one which the user operates under. A choice of the use condition (print mode, print conditions and so on) can reduce the CO₂ emission during Use & maintenance stage.
CO₂ emission in Raw material acquisition is the second largest as 15%. It is important to reduce the size and weight, and to use low environmental impact materials.

• We evaluated the CFP with Canon's own data of raw materials weight and the general basic unit for the parts because it is difficult to collect the data for a couple of thousands of parts. Accordingly, the results may be different from the specific product specification.

As such, please be advised that this result would be a rough estimate.

5. Assumptions of secondary data used

IDEA v2.1.3, and registered data of Japan EPD Program by SuMPO, JLCA data v1.13 are used.

6. Remarks

-

- For data quantification, please refer to PCR and Rules on quantification and declaration.

- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)

- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.
