Main specifications of the product

Model name: Canon Inkjet All-In-One TR7820 Specifications

- Printers and multifunction machines (Inkjet method)
- · Maximum paper size: Legal.

Company Information

Canon Inc.

30-2, Shimomaruko 3-chome, Ohta-ku, Tokyo 146-8501, Japan +81-3-3758-2111

Registration#	JR-AI-23442C		
PCR number	PA-590000-AI-08		
PCR name	Imaging input and/or output equipment		
Publication date	12/6/2023		
Verification date	11/29/2023		
Verification method	Product-by-product		
Verification#	JV-AI-23442		
Expiration date	11/28/2028		
DCD review was conducted by			

PCR review was conducted by:

Approval date	9/1/2023

1. Quantification results, and contents of the declaration CFP quantification unit:

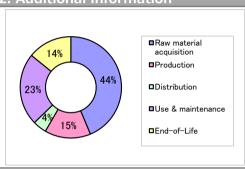

Parameter			Unit
CFP Quantification results		130	kg-CO₂eq
	Raw material acquisition	57	kg-CO₂eq
Breakdown	Production	19	kg-CO₂eq
	Distribution	5.7	kg-CO₂eq
	Use & maintenance	30	kg-CO₂eq
	End-of-Life	18	kg-CO₂eq
Value on CFP mark		130	kg-CO₂eq
Unit for the value on CFP mark		Per unit product	

^{*}Quantification results may slightly differ from the sum of the breakdown due to rounding of fractions.

3. Supplementary environmental information

- Complies with the EU RoHS Directive (2011/65/EU) and its amendments including 2015/863/EU.
- Manufactured at ISO 14001 certified factories.

2. Additional information

Calculated in the following conditions;

- · Printing paper is not considered.
- The standard scenario for Printers and multifunction machines (Inkjet method)
- US market.
- · Print volume: 7,200 sheets.
- The applied Energy Star program version is 3.0.

4. Interpretation

- \cdot CO₂ emission in Raw material acquisition is the largest as 44%. It is important to reduce the size and weight, and to use low environmental impact materials.
- · CO₂ emission in Use & maintenance is the second largest as 23%. It is important to save energy during product usage, and to reduce amount of ink used when printing. The condition in this CFP evaluation can be different from the one which the user operates under. A choice of the use condition (print mode, print conditions and so on) can reduce the CO₂ emission during Use & maintenance stage.
- · We evaluated the CFP with Canon's own data of raw materials weight and the general basic unit for the parts because it is difficult to collect the data for a couple of thousands of parts. Accordingly, the results may be different from the specific product specification.

As such, please be advised that this result would be a rough estimate.

5. Assumptions of secondary data used

IDEA v2.1.3, and registered data v1.13 of Japan EPD Program by SuMPO are used.

6. Remarks

•

- For data quantification, please refer to PCR and Rules on quantification and declaration.
- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)
- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.
