1. Quantification results, and contents of the declaration

CFP quantification unit :

Parameter			Unit
CFP Quantification results		490	kg-CO₂eq
Breakdown	Raw material acquisition	220	kg-CO ₂ eq
	Production	1.7	kg-CO ₂ eq
	Distribution	12	kg-CO ₂ eq
	Use & maintenance	250	kg-CO ₂ eq
	End-of-Life	11	kg-CO ₂ eq
Value on CFP mark		490	kg-CO₂eq
Unit for the value on CFP mark		Per unit product	

*Quantification results may slightly differ from the sum of the breakdown due to rounding of fractions.

3. Supplementary environmental information

• Manufactured at ISO 14001 certified factories.

2. Additional information

- Assumed destination of the product when calculated: North America, Europe
- Calculation method for the use & maintenance stage
Estimated usage period: 5 years
Load on the image output media during use is not included.
- Scenario used for load calculation: sheetfed scanner
Category: Medium speed2
Calculation was made under the following situation based on the scenario.
A4 vertical feeding, 200dpi,
90ppm(Simplex) /180ipm(Duplex)

4. Interpretation

- The load for the Raw material acquisition is 44%. Out of them, plastic causes the largest load
- The load for the Use & maintenance is 51%. Approx. 62% of them are the power consumption by scanner use. Reduction of the power consumption when scanning is an important factor for reducing CO2 emissions. Since the use & maintenance stage is evaluated under representative usage conditions, results may vary depending on the used environments. For example, it would be possible to reduce CO2 emissions for the use & maintenance stages by frequently turning off the main power.
- While our own data is utilized for the used raw material quantity, it is difficult to collect data on hundreds of parts. Therefore, general value is used as the data for raw material production, and it may not reflect the unique characteristics of this product.
For these reasons, please understand this result as an approximate value.

5. Assumptions of secondary data used

IDEA v3.1 are used.

6. Remarks

-

- For data quantification, please refer to PCR and Rules on quantification and declaration.
- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied.

- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.
