Carbon Footprint of Products CFP Declaration Registration number: JR-AV-23008C

Japan EPD Program by SuMPO

Sustainable Management Promotion Organization 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

CITIZEN WATCH CO.,LTD

CITIZEN L(EM066)

EM0667-60D

Functional unit	Registration#	JR-AV-23008C	
1 product	PCR number	PA-641111-AV-04	
1 product	PCR name	Watch	
System boundary	Publication date	6/13/2023	
$\ \square$ final products $\ \square$ intermediate products	Verification date	6/7/2023	
Raw material acquisition stage	Verification method	Product-by-product	
Production stage Distribution stage End-of-Life stage	Verification#	rification# JV-AV-23008	
Main specifications of the product	Expiration date	6/6/2028	
Type:EM1060-87N, EM1063-89D,EM1062-57D	PCR review was conducted by:		
· Watch case material: Stainless steel	Approval date	1/6/2023	
Band material:stainless steel Watch glass: Sapphire glass	PCR review	Kanzaki Masayuki	
Photovoltaic power generation driven for about 6 months when fully charged	panel chair Japan Environmental Management Association for Industry		
Accuracy: Monthly difference ± 15 seconds	Third party verifier*		
· Waterproof: Waterproof performance for daily life Naitoh Kazuo		Naitoh Kazuo	
· Weight: 60.1909g	Independent verification of data & declaration in accordance		
Company Information with ISO/TS14067			
CITIZEN WATCH CO.,LTD +81-42-468-4908	□internal ■ external		
Environmental Management Division	*Auditor's name is stated if system certification has been performed.		

Registration number: JR-AV-23008C

1. Quantification results, and contents of the declaration CFP quantification unit:

Parameter			Unit	
CF	P Quantification results	8.8	kg-CO₂eq	
Breakdown	Raw material acquisition	8.4	kg-CO₂eq	
	Production	0.21	kg-CO₂eq	
	Distribution	0.087	kg-CO₂eq	
	Use & maintenance	0.0	kg-CO₂eq	
	End-of-Life	0.08	kg-CO₂eq	
Value on CFP mark		8.8	kg-CO₂eq	
Unit for the value on CFP mark		1 product		

^{*}Quantification results may slightly differ from the sum of the breakdown due to rounding of fractions.

2. Additional information

4. Interpretation

- At about 96%, the load at the raw material acquisition stage is very high. This is due to the heavy load associated with stainless steel and copper alloys parts and their processing. The selection of raw materials and the improvement of processing methods are thus both crucial.
- •The figures at the distribution stage are low because each wristwatch is light and not bulky, and can be transported in large quantities by truck or other means at once.
- This product is equipped with a solar cell. In consequence, there is no need to replace batteries during the use & maintenance stage. Since the watch band is made of metal, it too does not need to be replaced. This results in a use & maintenance figure of 0%.
- When calculating the CFP, we use in-house data for the quantities of raw materials used. Collecting data for many of the components is, however, difficult. For that reason, the data for raw material generation is based on typical values for our processes. As a result, the data sometimes does not reflect the characteristics of this specific product. Kindly understand that, for the above reasons, these results are estimates.

5. Assumptions of secondary data used

IDEA v2.1.3, program registration basic unit 1.13 was used.

6. Remarks

- For data quantification, please refer to PCR and Rules on quantification and declaration.
- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)
- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.
