## ● General Information

### > Programme

Programme name	SuMPO EPD Japan
Programme operator	Sustainable Management Promotion Organization (SuMPO)
Address	KANDA SQUARE GATE 4F, 14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo, 101-0047, Japan
Website	<a href="https://ecoleaf-label.jp">https://ecoleaf-label.jp</a>

### > GPI and PCR

GPI	SuMPO EPD Japan General Program Instructions v.2.1.1
PCR name	Core-PCR for Construction products
PCR registration number	SuMPO-PCR-01000-2-0-1
PCR publication date	2025/03/31
PCR review panel chair	Toshiharu Ikaga
PCR valid until	2030/03/30
PCR issuer	Sustainable Management Promotion Organization (SuMPO)

EPD owner is responsible for the information contained in the EPD and for environmental claims related to the information. For any inquiries or requests regarding the content of the EPD, please contact the EPD owner.

EPDs are comparable only if they comply with the same standards, use the same sub-PCR where applicable, include all relevant information modules and are based on equivalent scenarios with respect to the context of construction works. Comparability of EPDs is limited to those applying a functional unit.

The LCIA results are relative expressions and do not predict impacts on category endpoints, the exceedance of thresholds, safety margins or risks.

When using weighted averages for calculation, the life cycle impact assessment results, life cycle inventory analysis-related information, waste-related information, and environmental information on output flows do not correspond to information about a specific product.

## ● EPD Owner's Information

Name of company and dept.	Kurimoto, Ltd. (Ductile Iron Pipe Division)
Address	1-12-19, Kitahorie, Nishi-ku, Osaka
Contact	+81-6-6538-7731
LCA practitioner	Planning Sec., Administration Dept., Ductile Iron Pipe Div., Kurimoto, Ltd.
Company description	Established in 1909, Kurimoto, Ltd. supports social infrastructure through its Lifeline, Machinery, and Construction Materials businesses. We operate ISO 9001 and 14001 certified factories dedicated to realizing a sustainable society.

## ●Product Information

Product name		Ductile Iron Pipe (DN300~2600)	
Product /model number		Type GX形, Type NS, Type S, Type US, Type PN, Type UF, Type K, Type T, Type U	
Product sepcification	Function	High-strength, ductile iron pipes for potable water transmission featuring excellent seismic/impact resistance and watertightness.	
	Mass	331~11180kg	Conversion factor —
	Applications	Primarily used for potable water distribution, agricultural irrigation, and industrial water supply.	
	TS*	Conforms to JIS G 5526, JWWA G 113, etc.	
Service life	Service life	Over 60 years	
	In-use conditions	Buried pipes in general soil environments	
	reference	Ministry of Land, Infrastructure, Transport and Tourism (Japan), "Reference Material: Examples of Setting Renewal Criteria"	
Manufacturing site(s)		Kagaya Factory, Kurimoto, Ltd. (2-1-64 Izumi, Suminoe-ku, Osaka)	
Product description		Ductile iron pressure pipes (DN 300–2600) primarily used for water mains, conveyance and transmission pipelines, agricultural irrigation, and industrial water supply.	
Website		<a href="https://www.kurimoto.co.jp/product/item/01/010.php">https://www.kurimoto.co.jp/product/item/01/010.php</a>	

\* TS: technical specifications,

## ●Product Content

Product components	Propotion (%)	Mass (unit)
Ductile iron pipe (Ductile iron part)	≧ 99 %	—
Internal and external coatings	< 1 %	—
Packaging materials	Propotion (%)	Mass (unit)
Cap	100	—

## ●Biogenic Carbon Content

Item	Content (kg-C)	Content (kg-CO <sub>2</sub> eq)
Biogenic carbon content per product	0.00	0.00
Biogenic carbon content in packaging	0.00	0.00

	Value	<input checked="" type="checkbox"/> Specific	<input type="checkbox"/> Average	<input type="checkbox"/> Representative <input type="checkbox"/> Worst case
Geographical coverage		Global		
Description of representativeness for multiple-products/sites EPD		Representativeness is considered to be ensured as the raw materials used per ton are identical across all products, all are manufactured at the same site in Japan, and the assessment is based on primary data collected for all raw material inputs and energy consumption.		
Description of variation for multiple-products/sites EPD		All products are manufactured at the same site under identical conditions regarding material and energy inputs per declared unit (1 ton). Consequently, variations in the calculation results for the relevant disclosure items fall within ±10%.		
Description of products covered in the multiple products EPD		This EPD discloses data converted to a per-ton basis for products with differing nominal diameters and joint types, all manufactured at the same site using identical materials and processes.

■ : declared module      — : module not declared

**> Allocation**

Allocation based on production weight was applied to some raw materials, energy, water, and waste, as it is difficult to distinguish them from other products (fittings) manufactured at the same factory.

**> Cut-off rules**

No cut-off

**> System Boundary**

Defined based on the PCR.

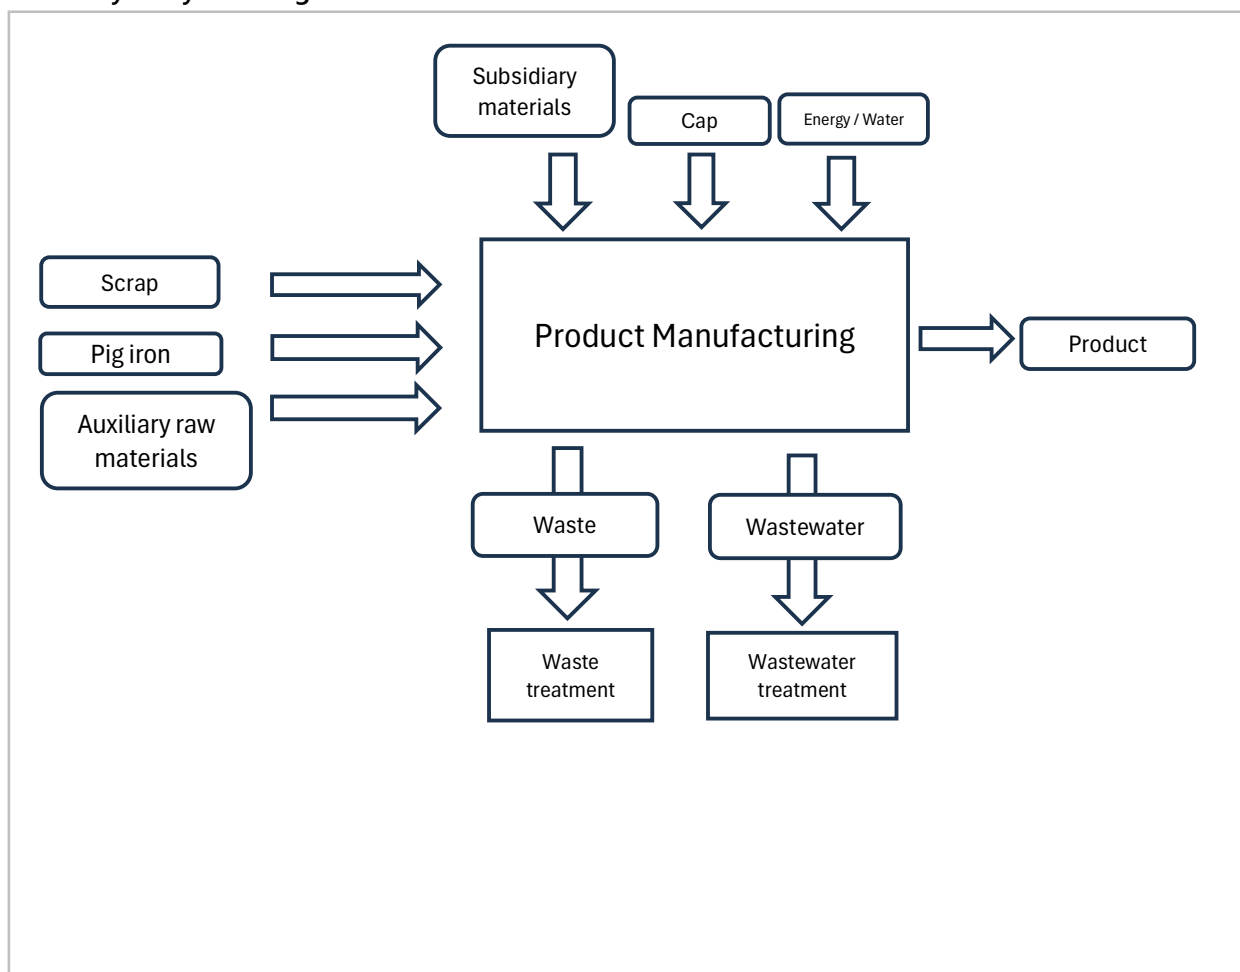

**> Scenario**

Modules	Description
A2	For land transport to the factory, the PCR scenario is used for transport distance, truck tonnage, and load factor.
A3	For the transport of auxiliary materials and waste, the PCR scenario is used for transport distance, truck tonnage, and load factor.

**> Electricity Modelling**

Data for the average Japanese grid electricity in 2018 was used.

\*It indicates the amount of waste generated throughout the lifecycle.

### > Description of LCA Results

- This calculation covers medium- and large-diameter straight pipes (including accessories).
- The primary data collection year is FY2024.
- For transport where the distance or mode was unknown, the PCR scenario was followed.
- The electricity intensity used is "Electricity, Japan average, FY2018".

## ● Additional Environmental Information

### > Additional Environmental Information not related to LCA

Manufactured at an ISO 14001 certified factory.

### > Information on Hazardous Substances

Hazardous materials name	CAS No.	Standards or regulations
