EPD owner is responsible for the information contained in the EPD and for environmental claims related to the information. For any inquiries or requests regarding the content of the EPD, please contact the EPD owner.

EPDs are comparable only if they comply with this document, use the same sub-PCR where applicable, include all relevant information and are based on equivalent scenarios. Comparability of EPDs is limited to those applying a functional unit.

The LCIA results are relative expressions and do not predict impacts on category endpoints, the exceedance of thresholds, safety margins or risks.

When using weighted averages for calculation, the life cycle impact assessment results, life cycle inventory analysis-related information, waste-related information, and environmental information on output flows do not correspond to information about a specific product.

## ● EPD Owner's Information

Name of company and dept.	RISO KAGAKU CORPORATION
Address	Riso Research and Design Center, 2-8-1 Gakuen-minami, Tsukuba-shi, Ibaraki 305-0818, Japan
Contact	+81-29-850-5314
LCA practitioner	Kazuki Nomura (Product Environment Section)
Company description	Business Operations: Development, manufacturing, and sales of high-speed inkjet printer "ORPHIS," digital duplicator "RISOGRAPH," along with related hardware, equipment, and consumables.

## ● Product Information

Product name	ComColor FT5000E II		
Product /model number	FT5000E II		
Product specification	Function	165kg	Conversion factor None
	Mass	High-Performance Inkjet Printer	
	Applications	Print office documents like meeting materials at high speed and low cost.	
	TS*	-	
RSL (Reference Service Life)	Service life	5 years	
	In-use conditions	TEC measurement conditions comply with the International ENERGY STAR Program's operational rules (specifically, Table 2-3: Measurement Method for Imaging Equipment under the Operational Rules of the International ENERGY STAR Program for Imaging Equipment, effective June 1, 2020).	
	reference	Based on the estimated period of use for printers and multi-function devices (High performance Inkjet) as defined in the PCR for Imaging Equipment.	
Manufacturing site(s)	Tsukuba Works Plant No. 2 and No. 3		
Product description	Product Type: High-Performance Inkjet Printer Maximum paper size (standard cassette):340 mm × 550 mm (Straight Feed / Simplex) Printing Method: High-Performance Inkjet		
Website	<a href="https://us.riso.com/">https://us.riso.com/</a>

### > Allocation

In this calculation, process subdivision and allocation were examined following the procedures outlined in the GPI. In the manufacturing processes for the main unit and ink, other inkjet printer products are generated as co-products. Since avoiding allocation through process subdivision was difficult, and the economic value of the product in this application is equivalent to that of the other inkjet printers from the same process, physical allocation was applied.

### > Cut-off rules

Transport-related impacts for components, raw materials, packaging, and accessories.

### > System Boundary

#### 【Target Life Cycle Stages】

The assessment covers all mandatory life cycle stages: Raw Material Acquisition, Manufacturing, Distribution, Use and Maintenance, and End-of-Life (Final Treatment).

#### 【Temporal System Boundary】

The temporal boundary for the system is set at 100 years, beginning from the year of primary data collection.

### > Scenario

#### 【Distribution Stage, Use and Maintenance Stage】

Transportation Mode & Loading Rate: PCR scenarios applied.

Transportation Distance: Both PCR and internal company scenarios applied.

#### 【End-of-Life Stage】

Transportation Mode, Loading Rate, & Distance: PCR scenarios applied.

### > Electricity Modelling

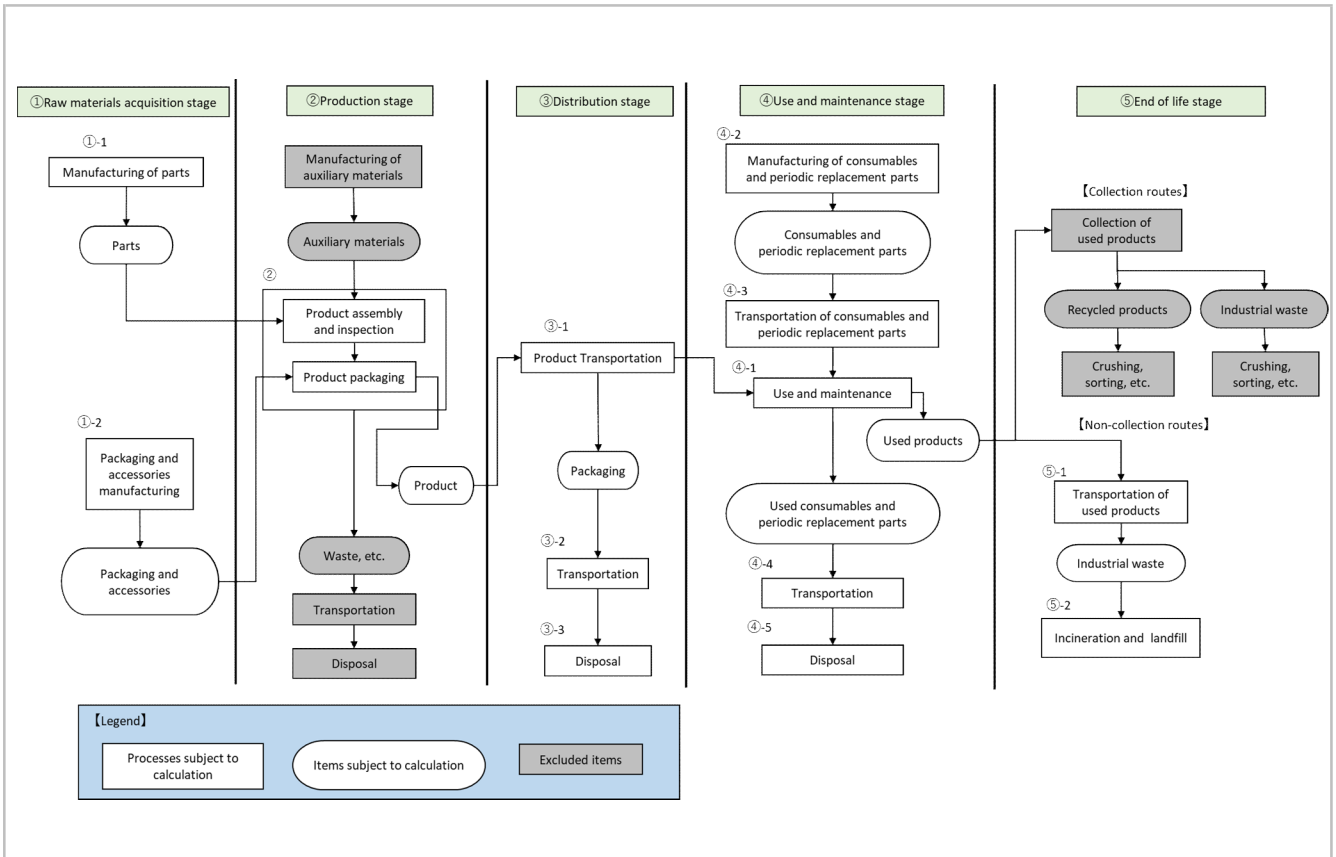

#### 【Calculation Data Sources】

Use and Maintenance Stage: Public Electricity, USA (IEA, 2015)

Other Stages: Grid Electricity, Japan Average (FY2018)

### > Description of LCA Results

Since generic values (emission factors) are used, the specific characteristics of the materials used in this product may not be fully reflected. Therefore, please use these results as an approximation.

- Product destination: North America
- Calculation method for use and maintenance stage: Based on PCR scenarios
- Assumed product lifespan: 5 years
- Total lifetime print volume: 1,497,600 sheets
- Applied International ENERGY STAR Program version: Version 3.2
- Environmental impact of printing paper during the use and maintenance stage is not included.
- Product selected for the impact calculation scenario: High-Performance Inkjet
