Canon Inc.

Color imageCLASS MF1333C(For US)

Functional unit	Registration#	JR-AI-23301C
Per unit product	PCR number	PA-590000-AI-07
	PCR name	Imaging input and/or output equipment
System boundary	Publication date	10/6/2023
■ final products □intermediate products	Verification date	10/2/2023
Raw Material acquisition, Production, Distribution,	Verification method	Product-by-product
Use & maintenance, and End-of-Life stage	Verification#	JV-AI-23301
Main specifications of the product	Expiration date	10/1/2028
Model name	PCR review was conducted by:	
Color imageCLASS MF1333C(For US) Specifications • Multi Functional Printer (Electrophotography) • CL • Print Speed : Up to 35 ipm (LTR) • Max paper size : LGL • Print/copy/scan/FAX/Duplex printing/ADF • Weight: approx.22kg(Cartridge not included)	Approval date	4/24/2023
	PCR review	Masayuki Kanzaki
	panel chair	Sustainable Management Promotion Organization
	Third party verifier*	
		Kazuo Naito
	Independent verification of data & declaration in accordance with ISO/TS14067	
Company Information	□internal ■external	
Canon Inc.	*Auditor's name is stated if system certification has been performed.	
30-2, Shimomaruko 3-chome, Ohta-ku,		
Tokyo 146-8501, Japan +81-3-3758-2111		
	Registration number : JR-AI-23301C	

Carbon Footprint of Products **CFP** Declaration

Registration number : JR-AI-23301C

1. Quantification results, and contents of the declaration CFP quantification unit : Parameter Unit 700 **CFP** Quantification results kg-CO₂eq 240 kg-CO₂eq Raw material acquisition Breakdown kg-CO₂eq Production 11 17 kg-CO₂eq Distribution 390 Use & maintenance kg-CO₂eg End-of-Life 35 kg-CO₂eq Value on CFP mark 700 kg-CO₂eq Unit for the value on CFP mark Per unit product

*Quantification results may slightly differ from the sum of the breakdown

2. Additional information Calculated in the following conditions; • Printing paper is not considered. Raw material The standard scenario for Multifunction Device (EP acquisition Production 35% type). Distribution • US market. 56% Print volume: 182,400 sheets. ■Use & maintenance 2% • The applied Energy Star program version is 3.0. ■End-of-Life 2%

4. Interpretation

• CO₂ emission in Use & maintenance is the largest as 56%. It is important to save energy during product usage, to make the life time of consumables(e.g. drum) longer and to reduce amount of toner used when printing. The condition in this CFP evaluation can be different from the one which the user operates under. A choice of the use condition (print mode, print conditions and so on) can reduce the CO₂ emission during Use & maintenance stage. • CO₂ emission in Raw material acquisition is the second largest as 35%. It is important to reduce the size and weight, and to use low environmental impact materials.

• We evaluated the CFP with Canon's own data of raw materials weight and the general basic unit for the parts because it is difficult to collect the data for a couple of thousands of parts. Accordingly, the results may be different from the specific product specification.

As such, please be advised that this result would be a rough estimate.

5. Assumptions of secondary data used

IDEA v2.1.3, and registered data v1.13 of Japan EPD Program by SuMPO are used.

6. Remarks

- For data quantification, please refer to PCR and Rules on quantification and declaration.

- Comparative assertion is permitted only when Rules on quantification and declaration are satisfied. (Reference URL : https://ecoleaf-label.jp/regulation/)
- The CFP only addresses the single impact category of climate change and does not assess other potential social, economic and environmental impacts arising from the provision of a product.

14-8, Uchikanda 1-chome, Chiyoda-ku, Tokyo Japan https://ecoleaf-label.jp/

3. Supplementary environmental information

 Complies with the EU RoHS Directive (2011/65/EU) and its amendments including 2015/863/EU.

 Manufactured at ISO 14001 certified factories.
